ARRAYWORKS

When Everything Is Connected Everything Matters

Arrayworks' Transformation Acceleration Platform (TAP), our low-code application platform, seamlessly fuses together Rapid Application Development, Process Automation, API enablement, Digital Twin, Cloud, IoT, and AI technologies into one Integrated Platform, enabling organizations to continually adapt and efficiently incorporate new technologies into their operating models.

TAP-ing into what our customers love:

- **Speed of Innovation** - Business leaders & IT collaborate to quickly build, adapt and deploy new products and services.

- **World Leading AI & IoT** - Incorporate AI and IoT capabilities to support more informed human decisions while enabling intelligent automation of predictive and prescriptive actions across the entire organization.

- **Omni-channel Customer Engagement -** Enable customer engagement across all channels within a single platform solution, for higher customer satisfaction.

- **Ease of Integration -** Our API tool enables fast integration with legacy systems, new solutions and third party data sources to support constant advancement of platform capabilities.

- **Work from Anywhere -** Enable employees to work from any location without missing a beat. Deploy on-premise or in the cloud to support remote workers and limit service disruptions.

- **Simplified Process Design** - Process owners quickly design and continually adapt processes to deliver engaging customer experiences.

- **Best Practices & Knowledge Library -** Organizations self-curate and share best practices to ensure consistent messaging and support workers with the most up-to-date information.

- **Auto-Documentation** - Auto-documenting processes save time and money on the back end of your projects to comply with organizational policies.

- **Role Specific Insights** - Customizable role specific dashboards guide workers to prioritized and complete work efficiently.

- **Data Analysis & Visualization** - Embedded multi-dimensional analysis tool to spot process bottlenecks and uncover hard to see opportunities and emergent trends.

- **E-signing** - Easily digitize all documents and securely process business forms anytime on any device.

- **Security** - Embedded platform security at every level to ensure privacy and confidentiality of information.

> The beauty of Arrayworks is that it provides an awareness of the organization, meaning you really understand what's going on in your business at every point in time, allowing you to adjust the business based on every customers requirements ... providing agility that virtually no other software product provides.
