

When Everything Is Connected Everything Matters

Rapid digital transformation has become imperative to remaining competitive. Modern application platforms provide the stage for business and IT to collaborate, achieve consensus, and deliver faster - better solutions.

The Beauty of Arrayworks is that it provides an awareness of the organization, meaning you really understand what's going on in your business at every point in time, allowing you to adjust the business based on every customer's requirements ... providing agility that virtually no other software product provides.

Tom Koulopoulos,
CEO Delphi Group

With roughly 6.4 billion connected "things" worldwide in production by the end of 2016, this number is expected to mushroom to more than 20 billion by 2020.

Accelerate your digital transformation. Our platform's unique data-driven model lets you bring your business processes to life, adapt them on the fly, and tie everything together on a single platform. Built from the ground up to manage today's velocity, veracity and variety of data, you'll be creating flexible apps tailored to the exact needs of your business. By uniting knowledge, resources and existing systems, you can guide every employee to greater achievements, deliver superior customer experiences, and lead your business to extraordinary outcomes.

What our customers love:

- **Full set of declarative tooling** – Allowing process owners to collaborate with IT to easily design and implement complex processes that can be easily updated to reflect changing customer and regulatory demands
- **Insights** - Customizable role specific dashboards that guide workers to complete work as prioritized by management
- **Data Visualization** – Multi-dimensional data visualization tools to uncover unseen connections between processes and disparate streams of data
- **Process Documentation** – Auto-documents processes as you build them, saving time and money on the back end of your projects
- **At-time knowledge** - Deliver on-demand information and instructions at any stage in the process ensuring consistent customer experiences
- **Sustainability** - Frameworks library for building, storing and sharing organizational best practices
- **Accountability** - Ubiquitous tasking capabilities highlight what is, and more importantly, what isn't getting done
- **Auditability** - Self-logging processes provide complete time stamped audit trails for every process instance
- **E-signing** – Easily digitize all your documents and securely process business forms anytime on any device.
- **Security** – Security at every level to ensure privacy and confidentiality of sensitive information for every process
